BUSINESS FAILURES IN FIRST HALF OF 1992
RISE 17 PERCENT TO 50,582, COMPARED WITH FIRST HALF OF 1991

Failures in June Up 21 Percent Over Year-Ago Level

New York and California Among Sharpest First-Half Increases

NEW YORK, Aug. 6--U.S. business failures increased 16.8 percent to 50,582 in the first half of 1992 from 43,324 in the same period of 1991, according to The Dun & Bradstreet Corporation.

"As the recession continues to take its toll across the U.S., business failures continue to climb above the record high levels reported last year," said Joseph W. Duncan, corporate economist and chief statistician. "Indeed, failures will most likely continue to rise during 1992, but by year end they may flatten out on a year-over-year basis."

For the month of June, business bankruptcies increased 21.1 percent to 8,437 from 6,969 in June of 1991.

"Business failures have been rising since April 1990, underscoring the breadth of the recession," said Duncan.

-MORE-

Every Industry Group Except Mining Reported Increases In First Half 1992

With the exception of the mining sector, every major industry group reported an increase in business failures in the first six months of 1992. The steepest increase was reported in the agriculture, forestry and fishing sector, up 33.2 percent to 1,542 from 1,158 in the same period of 1991.

The services sector posted a 24.4 percent increase to 13,856 from 11,141. Eight of the nine U.S. Census regions reported increases in services bankruptcies, with the sharpest increases occurring in the Middle Atlantic and Pacific regions. Services failures in the Middle Atlantic states soared 45.3 percent to 1,559 in the first six months of 1992 from 1,073 in the same period last year. Services failures in the Pacific states also increased sharply, up 44.7 percent to 4,324 from 2,988.

"Services failures have been at very high levels since the onset of the recession," said Duncan. "The sharp increases in services bankruptcies, particularly in New York and California, underscore the ongoing economic stress and recessionary pressures especially among smaller businesses that provide services to larger companies."

Failures Up in Finance, Insurance and Real Estate Sector -

Duncan noted that the finance, insurance and real estate sector also continues to report increases in business failures. Failures in this sector rose 17.1 percent to 3,230 in the first half of 1992 from 2,759 in the same period last year. The

sharpest increase was reported in the Pacific region, up 57.3 percent to 760 from 483, closely followed by the New England states, up 44.4 percent to 299 from 207; and the Middle Atlantic states, up 36.5 percent to 658 from 482.

Duncan noted that wholesale and retail trade failures continue to increase across the U.S., following a typical recessionary pattern. Overall, wholesale trade failures climbed 20.9 percent to 3,553 from 2,940, with the Middle Atlantic and Pacific regions reporting the sharpest increases. Retail trade failures increased 16.6 percent in the first half of 1992 to 9,952 from 8,533 in the same period of 1991.

During the first six months of 1992, manufacturing failures increased 18.1 percent to 3,766 from 3,190, with the sharpest increases reported in the Middle Atlantic and New England states.

Construction failures increased 12.9 percent to 6,665 from 5,904, while transportation and public utilities bankruptcies rose slightly to 1,978 from 1,917. Mining failures fell slightly to 195 from 207.

New York and California Drive Increases in Failures In the Middle Atlantic and Pacific States

"During the 1980's, the economies of New York and California grew rapidily, particularly in the services sector and the finance, insurance and real estate sector," said Duncan. "The sharp increase in business failures in these two states is due,

in part, to the ripple effect, as smaller suppliers to larger companies go under."

During the first six months of 1992, the Middle Atlantic states reported the sharpest increase in year-to-date bankruptcies, up 41.2 percent to 7,872 from 5,574. The steep increase in the region was primarily due to a 66.7 percent increase in New York to 4,113 from 2,467. Pennsylvania reported a 22.3 percent increase to 2,235 from 1,827, while failures rose 19.1 percent in New Jersey to 1,524 from 1,280.

Failures in the Pacific region increased 37.6 percent to 11,750 from 8,537 primarily due to a 42.6 percent increase in business failures in California.

For the other states in the Pacific region, the trend was mixed. Hawaii, Washington and Oregon reported increases in failures, while Alaska reported a slight decrease.

Duncan noted that while the New England states continue to report high levels of bankruptcies, the rate of increase slowed. Business failures in New England rose 19.3 percent to 3,224 from 2,703 in the same period of 1991. Vermont reported the sharpest increase in business failures, up 65.8 percent to 126, while New Hampshire reported a decline, down 6.9 percent to 391. Failures in Massachusetts increased 21.2 percent to 1,586 from 1,309.

East South Central Failures Down;
Failures Flat in West South Central

"The East and West South Central states have come through

the recession with the smallest increases in business failures," said Duncan.

During the first half of 1992, business failures in the East South Central states fell 10.2 percent to 2,116 from 2,357 in the same period of 1991. At the same time, failures in the West South Central states were nearly flat at 5,288 compared with 5,198 last year.

Business failures in the West North Central states climbed 24.5 percent to 3,396 from 2,727. In the East North Central states failures rose 2.4 percent to 5,722 from 5,590. The South Atlantic states reported a slight increase in business failures, up 5.6 percent to 7,866 from 7,452, with Florida reporting a 14.6 percent increase, while Georgia reported a decrease of 11.7 percent.

Failures Rise Sharply in June

"Following a year-over-year decline in business failures in May, bankruptcies jumped 21.1 percent to 8,437 in June from 6,969 in June last year," said Duncan.

On an industry basis, failures were up in every major sector except mining. Mining failures fell 21.9 percent to 25 from 32. The services sector posted the sharpest increase in business failures in June, up 29.6 percent to 2,257 from 1,741 in June of 1991. Manufacturing failures also increased sharply, up 27.9 percent to 623 from 487. In addition, construction failures remain at high levels, up 23.9 percent to 1,157 from 934.

Retail trade failures increased 21.4 percent to 1,635 in June 1992 from 1,347 in June last year. Of the remaining industry groups, failures rose between 12 and 18 percent in June compared with the same month last year.

Failures Up Sharply In Pacific, Middle Atlantic and New England Regions In June

Six of the nine U.S. Census regions reported increases in business bankruptcies in June, with the Pacific, Middle Atlantic and New England regions reporting the sharpest increases.

Business failures rose 43.9 percent in the Pacific states, to 1,981 from 1,377, driven by a sharp increase in California, up 46.8 percent to 1,638.

Duncan noted that in the Middle Atlantic states, New York was the driving force behind an overall increase in failures of 48.5 percent. New York posted a 98.3 percent increase, with 723 business failures, accounting for more than half of the region's 1,338 failures in June.

In New England, business failures rose 35.8 percent to 611 from 450. Among the states in the region, Connecticut posted the sharpest increase, up 122.9 percent to 156 from 70.

For the month of June, the South Atlantic and the East and West North Central states reported increases of between 13 and 14 percent.

The East South Central states posted a 9.2 percent decrease in failures in June. Failures also fell in the Mountain and West South Central states, down 3 and 2 percent, respectively.

Dun & Bradstreet's business failure statistics include businesses that ceased operations following assignment or bankruptcy; ceased operations with losses to creditors after such action as foreclosure or attachment; voluntarily withdrew leaving unpaid obligations; were involved in court actions such as receivership, reorganization or arrangement; or voluntarily compromised with creditors.

The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide revenue of $4.6 billion in 1991.
